19. The contractor shall confirm and test the AED system in compliance with the manufacturer's specifications.

20. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

21. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

22. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

23. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

24. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

25. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

26. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

27. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

28. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

29. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

30. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

31. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

32. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

33. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

34. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

35. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

36. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

37. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

38. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.

39. The contractor shall be responsible for the disposal of removed and uninstalled pipes to proper disposal sites or and verify all utility lines before excavation.
